When did you work with the project

We worked with this sprint during our weekly meeting, and home after school.

Sprint goal

Change colours, since we have used a lot red, which we think is associated with exiting pages. Make use case and html md basic html. Design database structure.

Work distribution

We will work with these tasks mainly together since theres a lot of decisions to make which we should agree on, therefore most of the work will be done together, and finishing touches on etc will be done home before next week.

Accomplishment

We changed colors into more blue shades and will be testing out these colors going forward. The html md, basic html and database structure is pretty much finished but we feel like there is room for improvement and will work with these tasks alongside others during the study time we use at home.
